

## No.94 Diversity

Diversity is difference without judgement; all things along a spectrum, valued equally.

Think about diversity:

- Which 2 are most alike and why?
- Which 2 are most different and why?
- Which best represents 'diversity'?
- Rank them.
- What impact does ranking have?

*Who out of the people you know is most different to you?*

*Who is most like you?*

*What is best, difference or similarity?*
